## St. Paul Teachers' Retirement Fund Association

 GASB Statement Nos. 67 and 68 Accounting and Financial Reporting for Pensions June 30, 2023St. Paul Teachers' Retirement Fund Association<br>2550 University Avenue W, Suite 312N<br>St. Paul, Minnesota 55114

Dear Trustees:

This report provides accounting and financial reporting information that is intended to comply with the Governmental Accounting Standards Board (GASB) Statement Nos. 67 and 68 for the St. Paul Teachers' Retirement Fund Association ("SPTRFA" or "Fund"). These calculations have been made on a basis that is consistent with our understanding of these Statements.

GASB Statement No. 67 is the accounting standard that applies to the stand-alone financial reports issued by retirement systems. GASB Statement No. 68 establishes accounting and financial reporting for state and local government employers who provide their employees (including former employees) pension benefits through a trust. GASB Statement No. 82 is an amendment to Statements No. 67, No. 68, and No. 73, intended to improve consistency in the application of accounting statements.

Our calculation of the liability associated with the benefits described in this report was performed for the purpose of providing reporting and disclosure information that satisfies the requirements of GASB Statement Nos. 67 and 68. The Net Pension Liability is not an appropriate measure for measuring the sufficiency of plan assets to cover the estimated cost of settling the employer's benefit obligation. The Net Pension Liability is not an appropriate measure for assessing the need for or amount of future employer contributions. The calculation of the plan's liability for this report is not applicable for purposes of funding the plan. A calculation of the plan's liability for purposes other than satisfying the requirements of GASB Statement No. 67 may produce significantly different results. The information in this report is calculated on a total plan basis. The Fund is responsible for preparing the Schedule of Employer Allocations and the Schedule of Pension Amounts by Employer. This report may be provided to parties other than the St. Paul Teachers' Retirement Fund Association only in its entirety and only with the permission of the Board. GRS is not responsible for unauthorized use of this report.

This report is based upon information, furnished to us by the Fund, concerning retirement and ancillary benefits, active members, deferred vested members, retirees and beneficiaries, and financial data. If your understanding of this information is different, please let us know. This information was checked for internal consistency, but it was not audited.

This report complements the actuarial valuation report for funding purposes that was or will be provided to the Fund and should be considered in conjunction with that report. Please see the actuarial funding valuation report as of June 30, 2023 for additional discussion of the nature of actuarial calculations and more information related to participant data, economic and demographic assumptions, and benefit provisions.

This report was prepared using our proprietary valuation model and related software which, in our professional judgment, has the capability to provide results that are consistent with the purposes of the valuation and has no material limitations or known weaknesses. We performed tests to ensure that the model reasonably represents that which is intended to be modeled.

To the best of our knowledge, the information contained within this report is accurate and represents the actuarial position of the St. Paul Teachers' Retirement Fund Association according to the disclosed assumptions. All calculations have been made in conformity with generally accepted actuarial principles and practices, as well as with the Actuarial Standards of Practice issued by the Actuarial Standards Board.

The signing actuaries are independent of the plan sponsor.

Bonita J. Wurst and Sheryl L. Christensen are Members of the American Academy of Actuaries (MAAA) and meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained herein.

Respectfully submitted, Gabriel, Roeder, Smith \& Company

Bonita J. Wurst, ASA, EA, FCA, MAAA

Sheryl L. Christensen, FSA, EA, FCA, MAAA

## Discussion

## Accounting Standard

For pension plans that are administered through trusts or equivalent arrangements, Governmental Accounting Standards Board (GASB) Statement No. 67 establishes standards of financial reporting for separately issued financial reports and specifies the required approach for measuring the pension liability. Similarly, GASB Statement No. 68 establishes standards for state and local government employers (as well as non-employer contributing entities) to account for and disclose the net pension liability, pension expense, and other information associated with providing retirement benefits to their employees (and former employees) on their basic financial statements.

The following discussion provides a summary of the information that is required to be disclosed under these accounting standards. A number of these disclosure items are provided in this report. However, certain information, such as notes regarding accounting policies and investments, is not included in this report and the retirement system and/or plan sponsor will be responsible for preparing and disclosing that information to comply with these accounting standards.

## Financial Statements

GASB Statement No. 68 requires state or local governments to recognize the net pension liability and the pension expense on their financial statements. The net pension liability is the difference between the total pension liability and the plan's fiduciary net position. In traditional actuarial terms, this is analogous to the accrued liability less the market value of assets (not the smoothed actuarial value of assets that is often encountered in actuarial valuations performed to determine the employer's contribution requirement).

Paragraph 57 of GASB Statement No. 68 states, "Contributions to the pension plan from the employer subsequent to the measurement date of the collective net pension liability and before the end of the employer's reporting period should be reported as a deferred outflow of resources related to pensions." There were no contributions made to SPTRFA subsequent to the measurement date of June 30, 2023.

The pension expense recognized each fiscal year is equal to the change in the net pension liability from the beginning of the year to the end of the year, adjusted for deferred recognition of the liability and investment experience.

Pension plans that prepare their own, stand-alone financial statements are required to present two financial statements - a statement of fiduciary net position and a statement of changes in fiduciary net position in accordance with GASB Statement No. 67. The statement of fiduciary net position presents the assets and liabilities of the pension plan at the end of the pension plan's reporting period. The statement of changes in fiduciary net position presents the additions, such as contributions and investment income, and deductions, such as benefit payments and expenses, and net increase or decrease in the fiduciary net position.

## Notes to Financial Statements

GASB Statement No. 68 requires the notes of the employer's financial statements to disclose the total pension expense, the pension plan's liabilities and assets, and deferred outflows and inflows of resources related to pensions.

GASB Statement Nos. 67 and 68 require the notes of the financial statements for the employers and pension plans to include certain additional information. The list of disclosure items should include:

- A description of benefits provided by the plan;
- The type of employees and number of members covered by the pension plan;
- A description of the plan's funding policy, which includes member and employer contribution requirements;
- The pension plan's investment policies;
- The pension plan's fiduciary net position, net pension liability, and the pension plan's fiduciary net position as a percentage of the total pension liability;
- The net pension liability using a discount rate that is $1 \%$ higher and $1 \%$ lower than used to calculate the total pension liability and net pension liability for financial reporting purposes;
- Significant assumptions and methods used to calculate the total pension liability;
- Inputs to the discount rates; and
- Certain information about mortality assumptions and the dates of experience studies.

Retirement systems that issue stand-alone financial statements are required to disclose additional information in accordance with GASB Statement No. 67. This information includes:

- The composition of the pension plan's Board and the authority under which benefit terms may be amended;
- A description of how fair value is determined;
- Information regarding certain reserves and investments, which include concentrations of investments greater than or equal to 5\%, receivables, and insurance contracts excluded from plan assets; and
- Annual money-weighted rate of return.

## Required Supplementary Information

GASB Statement No. 67 requires a 10-year fiscal history of:

- Sources of changes in the net pension liability;
- Information about the components of the net pension liability and related ratios, including the pension plan's fiduciary net position as a percentage of the total pension liability, and the net pension liability as a percent of covered-employee payroll; and
- A comparison of the actual employer contributions to the actuarially determined contributions based on the plan's funding policy.

## Measurement of the Net Pension Liability

The net pension liability is to be measured as the total pension liability, less the amount of the pension plan's fiduciary net position. In actuarial terms, this will be the accrued liability less the market value of assets (not the smoothed actuarial value of assets that is often encountered in actuarial valuations performed to determine the employer's contribution requirement).

## General Implications of Contribution Allocation Procedure or Funding Policy on Future Expected Plan Contributions and Funded Status

Given the plan's contribution allocation procedure, if there are no changes in benefits, Chapter 356 required contributions are made, and all actuarial assumptions are met (including the assumption of the plan earning $7.00 \%$ on an actuarial value of assets basis, as prescribed by statutes), it is expected that:
(1) The normal cost of the plan is expected to remain approximately level as a percent of pay;
(2) The funded status of the plan is expected to gradually improve and is expected to be $100 \%$ funded within the next 25 years; and
(3) The unfunded liability will grow initially as a dollar amount before beginning to decline.

The projections in this report are strictly for the purpose of determining the GASB single discount rate and are different from a funding projection for the ongoing plan.

## Timing of the Valuation

An actuarial valuation to determine the total pension liability is required to be performed at least every two years. For employer reporting, the net pension liability and pension expense should be measured as of a date (measurement date) no earlier than the end of the employer's prior fiscal year, consistently applied from period to period. If the actuarial valuation used to determine the total pension liability is not calculated as of the measurement date, the total pension liability is required to be rolled forward from the actuarial valuation date to the measurement date.

The total pension liability shown in this report is based on an actuarial valuation performed as of June 30, 2023 and a measurement date of June 30, 2023.

## Single Discount Rate

Projected benefit payments are required to be discounted to their actuarial present values using a single discount rate. This rate differs depending on whether or not the Fund has a projected sufficiency of assets to pay benefits.

Due to the projected sufficiency of assets to pay benefits, the single discount rate is equal to the $7.00 \%$ longterm expected rate of return on pension plan investments, for the purposes of this valuation.

Had the Fund been projected to have insufficient assets to pay all projected benefits, the single discount rate would instead reflect a combination of (1) the $7.00 \%$ long-term expected rate of return on pension plan investments (for all years where a projected asset sufficiency exists), then (2) a lower tax-exempt municipal bond rate* (for all remaining years where projected asset insufficiencies exist).

## Recognition of Deferred Outflows and Inflows of Resources

Differences between expected and actual experience and changes in assumptions are recognized in pension expense using a systematic and rational method over a closed period equal to the average of the expected remaining service lives of all employees that are provided with pension through the pension plan (active employees and inactive employees) determined as of the beginning of the measurement period.

At the beginning of the current measurement period, the expected remaining service lives of all active employees in the plan was approximately 41,991 years. Additionally, the total plan membership (active employees and inactive employees) was 13,210 . As a result, the average of the expected remaining service lives for purposes of recognizing the applicable deferred outflows and inflows of resources established in the current measurement period is 3.0000 years (rounded).

Additionally, differences between projected and actual earnings on plan investments should be recognized in pension expense using a systematic and rational method over a closed 5-year period. For this purpose, the deferred outflows and inflows of resources are recognized in the pension expense as a level dollar amount over the closed period identified above.

## Notes to Schedule of Contributions

Methods and Assumptions Used to Determine Fiscal Year Ending June 30, 2023 Contribution Rates Reported in this Schedule:
Notes
Actuarially determined contribution rates are calculated as of each June 30 and apply to the fiscal year beginning on the day after the measurement date.

| Valuation Date | June 30, 2022 |
| :--- | :--- |
| Actuarial Cost Method | Entry Age Normal |
| Amortization Method | Level Percentage of Payroll, Closed |
| Remaining Amortization Period | 26 years |
| Asset Valuation Method | 5 -Year smoothed market; no corridor |
| Inflation | $2.5 \%$ |
| Salary Increases | $3.00 \%$ to $9.00 \%$; service based |
| Investment Rate of Return | $7.5 \%$ |
| Retirement Age | Experience-based table of rates that are specific to the type of eligibility condition. Last <br>  <br> updated for the 2018 valuation pursuant to an experience study of the period $2011-2016$. <br> Mortality |
|  | RP-2014 annuitant generational mortality table, projected with scale MP-2021 from a base <br> year of 2006, white collar adjustment, set back two years for females. |

Other Information:
Notes See separate funding report as of July 1, 2022 for additional detail.

# Schedule of Investment Returns Multiyear 

## Last 10 Fiscal Years

| FY Ending <br> June 30, | Annual <br> Return $^{1}$ |
| :---: | :---: |
| 2014 |  |
| 2015 | $18.50 \%$ |
| 2016 | $2.65 \%$ |
| 2017 | $0.34 \%$ |
| 2018 | $13.93 \%$ |
| 2019 | $9.75 \%$ |
| 2020 | $5.73 \%$ |
| 2021 | $0.10 \%$ |
| 2022 | $32.65 \%$ |
| 2023 | $(9.37) \%$ |
|  | $9.43 \%$ |

The St. Paul Teachers' Retirement Fund Association compiled this data and the related investment notes and furnished this information for inclusion within this report. We did not audit this information. We are not responsible for its accuracy or completeness.

## Rate of Return

The Association's money-weighted rate of return for the year ending June 30, 2023 was $9.43 \%$ (net of fees). The money-weighted rate of return expresses investment performance, net of fees, adjusted for the actual cash flows that took place during the performance period.

## Section D

## Notes to Financial Statements

Note - Section D is intended to assist in preparation of the financial statements of the St. Paul Teachers' Retirement Fund Association. Financial statements are the responsibility of management, subject to the auditor's review.

## Long-Term Expected Return on Plan Assets

The long-term expected rate of return on pension plan investments was determined using a buildingblock method in which expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These real rates of return are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. For each major asset class that is included in the pension plan's target asset allocation as of June 30,2023, these best estimates are summarized in the following table:

# Long-Term Expected Real Rate of Return* 

| Asset Class | Target Allocation | Long-Term Expected Real Rate of Return (Arithmetic) |
| :---: | :---: | :---: |
| Domestic Equity | 35\% | 6.55\% |
| International Equity | 20\% | 6.98\% |
| Fixed Income | 20\% | 3.45\% |
| Real Assets | 11\% | 3.90\% |
| Private Equity \& Alternatives | 9\% | 7.47\% |
| Opportunistic | 5\% | 6.08\% |
| Total | 100\% |  |

* For purposes of these calculations, SPTRFA's assumed inflation rate is $2.50 \%$.

The St. Paul Teachers' Retirement Fund Association compiled this data and the related investment notes and furnished this information for inclusion within this report. We did not audit this information. We are not responsible for its accuracy or completeness.

## Single Discount Rate

A Single Discount Rate of $7.00 \%$ was used to measure the total pension liability. This Single Discount Rate was based on the expected rate of return on pension plan investments of $7.00 \%$. The projection of cash flows used to determine this Single Discount Rate assumed that plan member contributions will be made at the current contribution rate and that employer contributions will be made at rates equal to the difference between actuarially determined contribution rates and the member rate. Based on these assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Regarding the sensitivity of the net pension liability to changes in the Single Discount Rate, the following presents the plan's net pension liability, calculated using a Single Discount Rate of $7.00 \%$, as well as what the plan's net pension liability would be if it were calculated using a Single Discount Rate that is one percent lower or one percent higher:

## Sensitivity of Net Pension Liability to the Single Discount Rate Assumption

(Dollars in Thousands)

|  | Current Single Discount |  |  |
| :---: | :---: | :---: | :---: |
|  | $\begin{gathered} \text { 1\% Decrease } \\ 6.00 \% \end{gathered}$ | Rate Assumption 7.00\% | $\begin{gathered} \text { 1\% Increase } \\ 8.00 \% \end{gathered}$ |
| Total Pension Liability | \$2,127,478 | \$1,891,617 | \$1,696,614 |
| Net Position Restricted for Pensions | 1,216,753 | 1,216,753 | 1,216,753 |
| Net Pension Liability | \$ 910,725 | \$ 674,864 | \$ 479,861 |

Note that we believe the $8.0 \%$ interest rate assumption does not comply with Actuarial Standards of Practice.

${ }^{11}$ The sum of these items equals the net investment income of $\$ 110,297$.

## Section E

## Summary of Benefits

# Summary of Benefit Provisions for Basic Members as of July 1, 2023 

## PARTICIPANTS

Licensed Educators first employed prior to July 1, 1978 by schools in the City of St. Paul or St. Paul College whose position requires a license from the Minnesota Professional Educator Licensing and Standards Board, who are not covered under the Social Security Act.

As of July 1, 2023, there are no remaining active Basic Members.

## ACCREDITED SERVICE

Service which has been verified and accredited by the Association for the purpose of determining contributions and benefits (may include service earned while working outside of St. Paul Public Schools, previous St. Paul service, military service and governmental service).

## ALLOWABLE ST. PAUL SERVICE

Service earned as a licensed educator in the St. Paul Public Schools, in the St. Paul College, or as an employee of the Association. Also includes service credited after receipt of payment as required, for licensed educators on leave.

## SALARY

Total compensation earned during a school year (July 1 to June 30 ) excluding lump sum payments for unused leave at termination and employer-paid insurance coverage.

# Summary of Benefit Provisions for Basic Members <br> as of July 1, 2023 

## AVERAGE SALARY

Average of the highest 5 years of salary during the last 10 years of St. Paul service while making contributions.

## NORMAL RETIREMENT BENEFIT

## Eligibility

Attainment of age 65 and 5 years of Accredited Service.

## Benefit

2.50 percent of Average Salary for each year of Accredited Service.

## EARLY RETIREMENT BENEFIT

## Eligibility

Attainment of age 55 and 5 years of Accredited Service.

## Benefit

The greater of the following benefits:

- 2.00 percent of Average Salary per year of Accredited Service, subject to a maximum of 40 years with a 0.25 percent reduction for each month the member is under age 65 . If the member has 25 years of Accredited Service, the reduction is taken from age 60, therefore no reduction is required if the member is age 60 or older. No reduction is taken if age plus years of Accredited Service totals at least 90 .
- 2.50 percent of Average Salary per year of Accredited Service, subject to a maximum of 40 years, reduced for each month the member is under age 65 using linear interpolation of the table listed below. The ultimate factors shown below for retirements on or after July 1,2024 will be phased-in over a 60-month period starting July 1, 2019.

| Age at Retirement | Retirements Prior to <br> July 1, 2019 |  | Retirements on or after <br> July 1, 2024 |
| :---: | :---: | :---: | :---: |
| $\mathbf{5 5}$ | 0.5376 |  | 0.4200 |
| $\mathbf{5 6}$ | 0.5745 |  | 0.4600 |
| $\mathbf{5 7}$ | 0.6092 |  | 0.5000 |
| $\mathbf{5 8}$ | 0.6419 |  | 0.5400 |
| $\mathbf{5 9}$ | 0.6726 |  | 0.5800 |
| $\mathbf{6 0}$ | 0.7354 |  | 0.6500 |
| $\mathbf{6 1}$ | 0.7947 |  | 0.7200 |
| $\mathbf{6 2}$ | 0.8507 |  | 0.7900 |
| $\mathbf{6 3}$ | 0.9035 | 0.8600 |  |
| $\mathbf{6 4}$ | 0.9533 |  | 0.9300 |
| $\mathbf{6 5}$ | 1.0000 |  | 1.0000 |

# Summary of Benefit Provisions for Basic Members <br> as of July 1, 2023 

## DISABILITY RETIREMENT BENEFIT

## Eligibility

Total and permanent disablement before attaining age 65 and 5 years of Accredited Service.

## Benefit

If the member is under age 65,75 percent of the member's annual contract salary less any Social Security and Workers' Compensation benefits payable until age 65. At age 65, a normal retirement benefit is calculated using the projected service and average salary as if the member had continued to teach in their position held at the time of disability. Members age 65 or older at time of disability receive a normal retirement benefit.

## DEFERRED RETIREMENT BENEFIT

## Eligibility

5 years of Accredited Service.

## Benefit

Benefit computed under law in effect at termination and payable as a normal or early retirement benefit. For members hired on or before June 30,2006 , the benefit is augmented at 3.00 percent compounded annually from the $1^{\text {st }}$ of the month following termination until the January $1^{\text {st }}$ after turning age 55 and then augmented at 5.00 percent compounded annually from that date to July 1, 2012. For members hired after June 30,2006 , the benefit is augmented at 2.50 percent compounded annually from the $1^{\text {st }}$ of the month following termination to July 1, 2012. Augmentation for all members, regardless of hire date, changed to 2.00 percent as of July 1, 2012 for the portion of benefit deferral which occurs after June 30, 2012 to June 30, 2019. After June 30, 2019, benefits are not augmented.

## PRE-RETIREMENT SURVIVOR BENEFIT (Family Benefit)

## Eligibility

Active member with five years of Accredited Service.

## Benefit

- Children's Benefit: 25 percent of the maximum Bachelor of Arts salary for the year in which the member died for each eligible child up to a maximum of two. Benefits are paid until the child attains age 18 , or 22 for full-time students.
- Spousal Benefit: 15 percent of the maximum Bachelor of Arts salary for an eligible spouse who has legal custody of an eligible child. Spousal benefits cease when the spouse remarries, dies, or elects the regular survivor benefit. Electing the regular survivor benefit does not disqualify the child from receiving the family benefit.

# Summary of Benefit Provisions for Basic Members as of July 1, 2023 

## SURVIVOR BENEFIT (Active or Retired Member)

## Eligibility

Active member or retired member with five years of Accredited Service. A surviving spouse must have been married to the member for three years at the earlier of death or retirement.

## Benefit

Retirement benefit earned at the time of death or retirement, whichever is earlier, reduced by the use of 100 percent joint survivorship tables, based on the ages of the member and survivor at the time of retirement.

## REFUND OF CONTRIBUTIONS

## Eligibility

Termination or death where no annuity is payable.

## Benefit

Member contributions with 6.00 percent interest accrued through June 30, 2011, 4.00 percent interest accrued through June 30, 2018, and 3.00 percent interest thereafter.

## REEMPLOYED ANNUITANTS

The School District shall make the regular employer contribution and additional employer contribution, plus a supplemental contribution equal to 2.5 percent of salary, on behalf of any retired member who is reemployed by the School District. Reemployed annuitants do not accrue additional benefits.

## NORMAL FORM OF RETIREMENT BENEFITS

Unreduced annuity payments made until the death of the member, with a 100 percent Joint and Survivor adjusted pension payable to the surviving beneficiary.

## BENEFIT INCREASES

1.0 percent per year on January 1.

An additional one-time, non-compounding benefit increase of 3.0 percent, payable for calendar year 2024 in a lump sum by March 31, 2024, to benefit recipients who have been receiving a benefit for at least 12 full months as of June 30, 2023.

For retirements on and after July 1, 2024, the first benefit increase is delayed until the retiree reaches Normal Retirement Age (not applicable to Rule of 90 retirees, Rule of 62/30 retirees, disability benefit recipients, or survivors).

# Summary of Benefit Provisions for Basic Members as of July 1, 2023 

## CHANGES IN PLAN PROVISIONS

A one-time, non-compounding benefit increase of 3.00 percent will be payable in a lump sum for calendar year 2024 by March 31, 2024.

# Summary of Benefit Provisions for Coordinated Members <br> as of June 30, 2023 

## STATUTORY CONTRIBUTIONS

Statutory contribution rates for members and their employers are shown as a percent-of-pay below.

| Contribution after June 30, | Member | Employer Regular | Employer Additiona |
| :---: | :---: | :---: | :---: |
| 2022 | 7.50\% | 8.80\% | 3.84\% |
| 2023 | 7.75\% | 9.00\% | 3.84\% |
| 2025 | 9.00\% | 9.75\% | 3.84\% |

## SUPPLEMENTAL CONTRIBUTIONS

1996 legislation provides for a variable amortization aid contribution paid annually on July 15 . The actual contribution during the past fiscal year was $\$ 838,000$.

Annual supplemental contributions of $\$ 14,827,000$ will be contributed by the State of Minnesota each October 1. The contributions will continue until the plan is $100 \%$ funded or until June 30, 2048, whichever occurs earlier.

2023 legislation provides for a one-time state aid contribution in the amount of $\$ 15,746,887$, to be paid on October 1, 2023.

## PARTICIPANTS

Licensed educators in the public schools of the City of St. Paul, excluding charter schools, whose position requires a license from the Minnesota Professional Educator Licensing and Standards Board, and who are covered under the Social Security Act and make contributions to the St. Paul Teachers' Retirement Fund Association, are covered under the Coordinated Plan.

## ALLOWABLE SERVICE

Service earned as a licensed educator in the St. Paul Public Schools, in the St. Paul College, or in certain charter schools, or as an employee of the Association. Also includes service credited after receipt of payment as required, for licensed educators on leave. Service is granted on a proportional basis for part-time teachers.

# Summary of Benefit Provisions for Coordinated Members <br> as of June 30, 2023 

## SALARY

Total compensation excluding lump sum payments for unused leave at termination and employer-paid insurance coverage.

## AVERAGE SALARY

Average of the highest five successive years of salary while making contributions. In cases where the Allowable Service is less than five years, Average Salary is based on the Allowable Service years.

## NORMAL RETIREMENT BENEFIT

## Eligibility

Three years of Allowable Service. The eligibility age is 65 for those hired before July 1, 1989. The eligibility age is the earlier of eligibility for full Social Security retirement benefits to a maximum of age 66 for those hired on or after July 1, 1989 and retired prior to July 1, 2025. Beginning July 1, 2025, the eligibility age is 65 for all members. A Proportionate Retirement Annuity is available at Normal Retirement Age with one year of Allowable Service.

## Benefit

1.70 percent of Average Salary for each year of Allowable Service rendered before July 1, 2015 and 1.90 percent of Average Salary for each year of Allowable Service rendered after June 30, 2015.

# Summary of Benefit Provisions for Coordinated Members as of June 30, 2023 

## EARLY RETIREMENT BENEFIT

## Eligibility

Attainment of age 55 and 3 years of Allowable Service.

## Benefit

Members hired before July 1, 1989 are eligible for the greater of the following benefits. Members hired after July 1, 1989 are eligible for the benefits shown in item (b):
a) For the first 10 years of Allowable Service, 1.20 percent of Average Salary for each year of Allowable Service rendered prior to July 1, 2015, plus 1.40 percent of Average Salary for each year of Allowable Service rendered after June 30, 2015. Additionally, for each subsequent year of Allowable Service in excess of 10 years, 1.70 percent of Average Salary for each year rendered prior to July 1, 2015, plus 1.90 percent of Average Salary for each year rendered after June 30,2015 . There is a reduction of 0.25 percent for each month the member is under age 65 , or under age 62 with 30 years of Allowable Service. No reduction applies if the age plus years of service totals at least 90.
b) 1.70 percent of Average Salary per year of Allowable Service rendered before July 1,2015 and 1.90 percent of Average Salary for each year of service rendered after June 30, 2015 reduced for each month the member is under the Normal Retirement Age using linear interpolation of the factors in the tables listed below. The ultimate factors shown below for retirements on or after July 1, 2024 will be phased in over a sixty-month period starting July 1, 2019. Effective July 1,2023 , no reduction applies if the member is at least age 62 with at least 30 years of service.

| Normal Retirement Age: <br> Age at Retirement | Under Age 62 or Less than 30 Years of Service |  |  |  | Prior to July 1, 2023 <br> Age 62 or Older with 30 Years of Service |  |

# Summary of Benefit Provisions for Coordinated Members as of June 30, 2023 

## DISABILITY RETIREMENT BENEFIT

## Eligibility

Total and permanent disablement and three years of Allowable Service with service earned within the current fiscal year and at least two years of Allowable Service since the last interruption in service.

## Benefit

Calculated as a normal retirement benefit payable for life without reduction for early commencement. At normal retirement age, the benefit converts from a disability benefit to a retirement benefit. The disability benefit is reduced by any Workers' Compensation benefits payable.

## DEFERRED RETIREMENT BENEFIT

## Eligibility

Three years of Allowable Service.

## Benefit

Benefit computed under law in effect at termination and payable as a normal or early retirement benefit. For members hired on or before June 30,2006 , the benefit is augmented at 3.00 percent compounded annually from the $1^{\text {st }}$ of the month following termination until the January $1^{\text {st }}$ after turning age 55 and then augmented at 5.00 percent compounded annually from that date to July 1, 2012. For members hired after June 30,2006 , the benefit is augmented at 2.50 percent compounded annually from the $1^{\text {st }}$ of the month following termination to July 1, 2012. Augmentation for all members, regardless of hire date, changed to 2.00 percent as of July 1,2012 for the portion of benefit deferral which occurs after June 30, 2012 to June 30, 2019. After June 30, 2019, benefits are not augmented.

## SURVIVOR BENEFIT (Active Members)

## Eligibility

Active member with three years of Allowable service. A surviving spouse is defined as the person legally married to the member at the time of death. If none, a dependent child who is the legal child of the member, who is less than 20 years of age and unmarried.

## Benefit

Retirement benefit earned at the time of death with choices for either a reduced for 100 percent joint survivorship, or $5-10-15-$, or 20 -year term certain. The benefit is available immediately upon application. Actuarial reductions assuming 2.5 percent augmentation for the calculation of the survivorship portion of a 100 percent joint and survivor benefit are actuarially determined based on the member's and survivor's ages at the death of the member.

Early retirement reductions apply to the survivor benefit based on the member's age when deceased. If the deceased member had not yet attained age 55 at time of death, the additional early retirement reduction from age 55 to the age of the member at death applies at only one-half of the actuarial rate.

# Summary of Benefit Provisions for Coordinated Members as of June 30, 2023 

## REFUND OF CONTRIBUTIONS

## Eligibility

Termination or death where no annuity is payable or a refund of contributions is chosen in lieu of an annuity.

## Benefit

Member contributions with 6.00 percent interest accrued through June 30, 2011, 4.00 percent interest accrued through June 30, 2018, and 3.00 percent interest thereafter.

## REEMPLOYED ANNUITANTS

The School District shall make the regular employer contribution and additional employer contribution, plus a supplemental contribution equal to 2.5 percent of salary, on behalf of any retired member who is reemployed by the School District. Reemployed annuitants do not accrue additional benefits.

## NORMAL FORM OF RETIREMENT BENEFITS

Straight life annuity. Actuarially equivalent options are available to provide post-retirement beneficiary or survivor benefits.

## BENEFIT INCREASES

1.0 percent per year on January 1 .

An additional one-time, non-compounding benefit increase of 1.5 percent, payable for calendar year 2024 in a lump sum by March 31, 2024, to benefit recipients who have been receiving a benefit for at least 12 full months as of June 30, 2023.

For retirements on and after July 1, 2024, the first benefit increase is delayed until the retiree reaches Normal Retirement Age (not applicable to Rule of 90 retirees, Rule of 62/30 retirees, disability benefit recipients, or survivors).

## CHANGES IN PLAN PROVISIONS

Member contributions will increase from $7.50 \%$ of pay to $7.75 \%$ of pay effective July 1,2023 , and from $7.75 \%$ of pay to $9.00 \%$ of pay effective July 1,2025 . Employer contributions will increase from $8.80 \%$ to $9.00 \%$ of pay effective July 1, 2023, and from $9.00 \%$ to $9.75 \%$ of pay effective July 1, 2025.

An additional one-time direct state aid contribution of $\$ 15.7$ million will be contributed to the Plan on October 1, 2023.

The Normal Retirement will change to age 65 for members hired after July 1, 1989, effective July 1, 2025.
Benefits at age 62 and 30 years of service are unreduced, effective July 1, 2023.
A one-time, non-compounding benefit increase of 1.5 percent will be payable in a lump sum for calendar year 2024 by March 31, 2024.

## Section F

Actuarial Cost Method and Actuarial Assumptions

## Actuarial Cost Method and Actuarial Assumptions

## I. Actuarial Cost Method

Normal cost and the allocation of benefit values between service rendered before and after the valuation date were determined using an Individual Entry-Age Actuarial Cost Method having the following characteristics:

1) The annual normal cost for each individual active member, payable from the date of employment to the date of retirement, is sufficient to accumulate the value of the member's benefit at the time of retirement; and
2) Each annual normal cost is a constant percentage of the member's year by year projected covered pay.

Actuarial gains/(losses), as they occur, reduce (increase) the Unfunded Actuarial Accrued Liability.

## II. Current Actuarial Assumptions

Assumptions are based on an experience study for the five-year period of July 1, 2016 to June 30, 2021, as well as a legislated change to the investment return assumption effective July 1, 2023.

## A. Demographic Assumptions

## Mortality:

1. Healthy and Disabled Annuitant Mortality:
a. Male: Pub-2010 Male Healthy Teacher Retiree Mortality Table, adjusted for mortality improvements using projection scale MP-2021 from 2010. Rates are multiplied by a factor of 1.03.
b. Female: Pub-2010 Female Healthy Teacher Retiree Mortality Table, adjusted for mortality improvements using projection scale MP-2021 from 2010. Rates are multiplied by a factor of 1.03 .
2. Employee Mortality:
a. Male: Pub-2010 Male Healthy Teacher Employee Mortality Table, adjusted for mortality improvements using projection scale MP-2021 from 2010.
b. Female: Pub-2010 Female Healthy Teacher Employee Mortality Table, adjusted for mortality improvements using projection scale MP-2021 from 2010.

| 19 | 3.10\% |  |  |
| 20 | 2.90\% |  |  |

The actuarial value of assets is smoothed by using a five-year average market value.

## Actuarial Cost Method and Actuarial Assumptions

## C. Other Assumptions

Marital Status:

Deferred Benefit
Commencement:

Administrative Expenses:

Refund of Contributions:

Allowance for Combined Service Annuity:

Missing Salary and Salary Minimums:

Missing Data for Deferred Vested Members:<br>Decrement Timing:

Eligibility Testing:

It is assumed that $75 \%$ of male members and $60 \%$ of female members have an eligible spouse. The male spouse is assumed to be two years older than the female spouse. Married members are assumed to have two dependent children.

Basic Plan members who terminate vested are assumed to commence benefits at age 61. Coordinated Plan members are assumed to commence benefits at age 63. If the member is already past the assumed deferral age, the member is assumed to commence benefits one year from the valuation date.

In the valuation year, equal to prior year administrative expenses expressed as a percent of prior year projected payroll. In each subsequent year, equal to the initial administrative expense percentage applied to payroll for the closed group.

All employees withdrawing after becoming eligible for a deferred benefit take the larger of their contributions accumulated with interest or the value of their deferred benefit. Account balances for deferred members accumulate interest until the assumed benefit commencement date and are discounted back to the valuation date.
20.0\% load on liabilities for former, vested members.
$9.0 \%$ load on liabilities for former, non-vested members.
Active members with reported salaries of $\$ 100$ or less were assumed to have the average non-zero active salary. Active members with salaries less than those reported at the prior valuation date are valued using their prior salary amount. Active members who have been hired within one year of the valuation date have had their pay annualized by dividing by months of service credited, not to exceed the average non-zero active salary. For members on leave of absence at valuation date who were not on leave at the prior valuation date, the prior year's valuation pay was used.

Deferred vested members without a reported benefit and without salary information were assumed to have a final average salary of $\$ 40,000$.

Retirement and Termination: end of valuation year - consistent with retirements and terminations occurring at the end of the school year.

Death and Disability: middle of valuation year.
Eligibility for benefits is determined based upon the age nearest birthday and service nearest whole year on the date the decrement is assumed to occur.

## Actuarial Cost Method and Actuarial Assumptions

Service Credit Accruals:<br>Supplemental Contributions:

Projected Annual Payroll Calculation:

Changes in Actuarial Assumptions Since the Prior Valuation:

It is assumed that members accrue one year of service credit per year. Exact fractional service is used to determine the amount of benefit payable.

1996 legislation provides for a variable amortization aid contribution paid annually on July 15 . We assumed the annual amortization aid contribution will equal $\$ 838,000$, which was the actual contribution for the most recent fiscal year. Additionally, annual supplemental contributions equal to $\$ 14,827,000$ are scheduled to be paid each October 1.

The contributions described herein will continue until the plan is $100 \%$ funded or until June 30, 2048, whichever occurs earlier.

The census data as of July 1, 2023 reflects retirements and terminations occurring during the months of May and June; however, it does not necessarily reflect the replacements hired to fill their positions who may have hire dates in August and September. We assumed that May and June retirements are replaced by members coming in at the B.A. entry salary level of $\$ 49,181$; the Projected Annual Payroll for the fiscal year ending June 30, 2024 includes this replacement salary amount.

The assumed wage inflation assumption was changed from $3.0 \%$ to $2.5 \%$.

Additional demographic assumption changes, as recommended in the most recent experience study, dated December 8, 2022:

- The base mortality table was changed from RP-2014 mortality table with adjustments to Pub-2010 for Teachers, with adjustments, and future improvement projected using MP-2021.
- Revised rates of retirement which generally result in more expected normal retirements and fewer early retirements.
- Revised rates of termination are generally lower, especially after the first year of employment for males and females.
- Reduced rates of disability.
- Retirement age assumption for Coordinated deferred members was changed from age 62 to age 63.
- Revised merit and seniority salary increase rates are 19 basis points lower in total. When combined with the change in wage inflation, gross salary increase rates are 69 basis points lower in total.

Members reaching age 62 with 30 years of service prior to age 65 are assumed to retire at the same rate as Rule of 90 unreduced retirements.

## Section G

## Calculation of the Single Discount Rate

## Calculation of the Single Discount Rate

GASB Statement No. 67 includes a specific requirement for the discount rate that is used for the purpose of the measurement of the Total Pension Liability. This rate considers the ability of the fund to meet benefit obligations in the future. To make this determination, employer contributions, employee contributions, benefit payments, expenses and investment returns are projected into the future. The Plan Net Position (assets) in future years can then be determined and compared to its obligation to make benefit payments in those years. As long as assets are projected to be on hand in a future year, the assumed valuation discount rate is used. In years where assets are not projected to be sufficient to meet benefit payments, the use of a municipal bond rate is required, as described in the following paragraph. The plan is projected to have sufficient assets to pay all benefits.

The Single Discount Rate (SDR) is equivalent to applying these two rates to the benefits that are projected to be paid during the different time periods. The SDR reflects (1) the long-term expected rate of return on pension plan investments (during the period in which the fiduciary net position is projected to be sufficient to pay benefits) and (2) tax-exempt municipal bond rate based on an index of 20-year general obligation bonds with an average AA credit rating as of the measurement date (to the extent that the contributions for use with the long-term expected rate of return are not met).

For the purpose of this valuation, the expected rate of return on pension plan investments is $7.00 \%$; the municipal bond rate is $3.86 \%$; and the resulting SDR is $7.00 \%$.

The tables in this section provide background for the development of the SDR.
The Projection of Contributions table shows the development of expected contributions in future years. Normal Cost contributions for future hires are not included (nor are their liabilities).

The Projection of Plan Fiduciary Net Position table shows the development of expected asset levels in future years.

The Present Values of Projected Benefit Payments table shows the development of the SDR. It breaks down the benefit payments into present values for funded and unfunded portions and shows the equivalent total using the SDR.

# Single Discount Rate Development Projection of Contributions (Dollars in Thousands)

| 50 | - | 1,020,048 | 1,020,048 | - | - | 125,874 | - | 125,874 |

* Contributions related to future employees in excess of normal cost and expenses of $10.25 \%$ of pay.
** Supplemental contributions are equal to $\$ 15,665,000$ until the earlier of $100 \%$ funding (on an AVA basis), or June 30, 2048; this contribution is assumed to end after 20 years. An additional one-time $\$ 15.7$ million direct state aid contribution is included for FYE June 30, 2024.

For purposes of this projection, based on GASB guidance, we assumed the statutory contribution rates would continue after the plan becomes fully funded unless noted otherwise. If we reflected a decrease in contribution rates due to full funding, future assets and contributions would be less than what is shown herein.

| 50 | 7,982,790 | 125,874 | 111,684 | - | 559,284 | 8,556,264 |

For purposes of this projection, based on GASB guidance, we assumed the statutory contribution rates would continue after the plan becomes fully funded unless noted otherwise. If we reflected a decrease in contribution rates due to full funding, future assets and contributions would be less than what is shown herein.

For purposes of this projection, based on GASB guidance, we assumed the statutory contribution rates would continue after the plan becomes fully funded unless noted otherwise. If we reflected a decrease in contribution rates due to full funding, future assets and contributions would be less than what is shown herein.

If we reflected a decrease in contribution rates due to full funding, future assets and contributions would be less than what is shown herein.

## Section H

 Glossary of Terms
## Glossary of Terms

| Accrued Service | Service credited under the system which was rendered before the date of the actuarial valuation. |
| :---: | :---: |
| Actuarial Accrued Liability (AAL) | The AAL is the difference between the actuarial present value of all benefits and the actuarial value of future normal costs. The definition comes from the fundamental equation of funding which states that the present value of all benefits is the sum of the Actuarial Accrued Liability and the present value of future normal costs. The AAL may also be referred to as "accrued liability" or "actuarial liability." |
| Actuarial Assumptions | These assumptions are estimates of future experience with respect to rates of mortality, disability, turnover, retirement, rate or rates of investment income and compensation increases. Actuarial assumptions are generally based on past experience, often modified for projected changes in conditions. Economic assumptions (compensation increases, payroll growth, inflation and investment return) consist of an underlying real rate of return plus an assumption for a long-term average rate of inflation. |
| Actuarial Cost Method | A mathematical budgeting procedure for allocating the dollar amount of the actuarial present value of the pension trust benefits between future normal cost and actuarial accrued liability. The actuarial cost method may also be referred to as the actuarial funding method. |
| Actuarial Equivalent | A single amount or series of amounts of equal actuarial value to another single amount or series of amounts, computed on the basis of appropriate actuarial assumptions. |
| Actuarial Gain (Loss) | The difference in liabilities between actual experience and expected experience during the period between two actuarial valuations is the gain (loss) on the accrued liabilities. |
| Actuarial Present Value (APV) | The amount of funds currently required to provide a payment or series of payments in the future. The present value is determined by discounting future payments at predetermined rates of interest and probabilities of payment. |
| Actuarial Valuation | The actuarial valuation report determines, as of the actuarial valuation date, the service cost, total pension liability, and related actuarial present value of projected benefit payments for pensions. |
| Actuarial Valuation Date | The date as of which an actuarial valuation is performed. |
| Actuarially Determined Contribution (ADC) or Annual Required Contribution (ARC) | A calculated contribution into a defined benefit pension plan for the reporting period, most often determined based on the funding policy of the plan. Typically, the Actuarially Determined Contribution has a normal cost payment and an amortization payment. |

## Glossary of Terms

| Amortization Payment | The amortization payment is the periodic payment required to pay off an <br> interest-discounted amount with payments of interest and principal. |
| :--- | :--- |
| Amortization Method | The method used to determine the periodic amortization payment may be <br> a level dollar amount, or a level percent of pay amount. The period will <br> typically be expressed in years, and the method will either be "open" <br> (meaning, reset each year) or "closed" (the number of years remaining will <br> decline each year). |
| Cost-of-Living Adjustments | Postemployment benefit changes intended to adjust benefit payments for <br> the effects of inflation. |
| Cost-Sharing Multiple- | A multiple-employer defined benefit pension plan in which the pension <br> obligations to the employees of more than one employer are pooled and <br> pension plan assets can be used to pay the benefits of the employees of <br> any employer that provides pensions through the pension plan. |
| Pension Plan (cost-sharing |  |
| pension plan) | The payroll of employees that are provided with pensions through the <br> pension plan. |
| Covered-Employee Payroll |  |
| Deferred Inflows and | The deferred inflows and outflows of pension resources are amounts used <br> under GASB Statement No. 68 in developing the annual pension expense. |
| Defflows |  |
| Deferred inflows and outflows arise with differences between expected |  |
| and actual experiences; changes of assumptions. The portion of these |  |
| amounts not included in pension expense should be included in the |  |
| deferred inflows or outflows of resources. |  |

## Glossary of Terms

| Entry Age Actuarial Cost Method (EAN) | The EAN is a cost method for allocating the costs of the plan between the normal cost and the accrued liability. The actuarial present value of the projected benefits of each individual included in an actuarial valuation is allocated on a level basis (either level dollar or level percent of pay) over the earnings or service of the individual between entry age and assumed exit age(s). The portion of the actuarial present value allocated to a valuation year is the normal cost. The portion of this actuarial present value not provided for at a valuation date by the actuarial present value of future normal costs is the actuarial accrued liability. The sum of the accrued liability plus the present value of all future normal costs is the present value of all benefits. |
| :---: | :---: |
| Fiduciary Net Position | The fiduciary net position is the market value of the assets of the trust dedicated to the defined benefit provisions. |
| GASB | The Governmental Accounting Standards Board is an organization that exists in order to promulgate accounting standards for governmental entities. |
| Long-Term Expected Rate of Return | The long-term rate of return is the expected return to be earned over the entire trust portfolio based on the asset allocation of the portfolio. |
| Money-Weighted Rate of Return | The money-weighted rate of return is a method of calculating the returns that adjusts for the changing amounts actually invested. For purposes of GASB Statement No. 67, money-weighted rate of return is calculated as the internal rate of return on pension plan investments, net of pension plan investment expense. |
| Multiple-Employer Defined Benefit Pension Plan | A multiple-employer plan is a defined benefit pension plan that is used to provide pensions to the employees of more than one employer. |
| Municipal Bond Rate | The Municipal Bond Rate is the discount rate to be used for those benefit payments that occur after the assets of the trust have been depleted. |
| Net Pension Liability (NPL) | The NPL is the liability of employers and non-employer contributing entities to plan members for benefits provided through a defined benefit pension plan. |
| Non-Employer Contributing Entities | Non-employer contributing entities are entities that make contributions to a pension plan that is used to provide pensions to the employees of other entities. For purposes of the GASB accounting statements, plan members are not considered non-employer contributing entities. |
| Normal Cost | The portion of the actuarial present value allocated to a valuation year is called the normal cost. For purposes of application to the requirements of this Statement, the term normal cost is the equivalent of service cost. |

## Glossary of Terms

## Other Postemployment Benefits (OPEB)

Real Rate of Return

## Service Cost

Total Pension Expense

Total Pension Liability (TPL)

Unfunded Actuarial Accrued Liability (UAAL)

Valuation Assets

All postemployment benefits other than retirement income (such as death benefits, life insurance, disability, and long-term care) that are provided separately from a pension plan, as well as postemployment healthcare benefits regardless of the manner in which they are provided. Other postemployment benefits do not include termination benefits.

The real rate of return is the rate of return on an investment after adjustment to eliminate inflation.

The service cost is the portion of the actuarial present value of projected benefit payments that is attributed to a valuation year.

The total pension expense is the sum of the following items that are recognized at the end of the employer's fiscal year:

1. Service Cost
2. Interest on the Total Pension Liability
3. Current-Period Benefit Changes
4. Employee Contributions (made negative for addition here)
5. Projected Earnings on Plan Investments (made negative for addition here)
6. Pension Plan Administrative Expense
7. Other Changes in Plan Fiduciary Net Position
8. Recognition of Outflow (Inflow) of Resources due to Liabilities
9. Recognition of Outflow (Inflow) of Resources due to Assets

The TPL is the portion of the actuarial present value of projected benefit payments that is attributed to past periods of member service.

The UAAL is the difference between actuarial accrued liability and valuation assets.

The valuation assets are the assets used in determining the unfunded liability of the plan. For purposes of GASB Statement Nos. 67 and 68, the valuation assets are equal to the market value of assets.
