*Yield reflects the fund's average income return over the previous seven days, assuming rates stay the same for one year, and is the total income net of expenses, divided by the total number of outstanding shares and includes waivers/reimbursements. The total return refers to a specific past holding period.

**Yield without waivers or reimbursements. Absent such reductions, returns would have been lower. Voluntary waivers/reimbursements may be discontinued any time.

For important disclosures, please see last page(s) of this report.

Total returns are historical and include change in share value and reinvestment of dividends and capital gains, if any. Cumulative total returns are reported as of the period indicated. Life of fund figures are reported as of the inception date to the period indicated. These figures do not include the effects of sales charges, if any, as these charges are waived for contributions made through your company's employee benefit plan. If sales charges were included, returns would have been lower.

EXPENSE RATIO

A mutual fund expense ratio is the total annual fund or class operating expenses (before waivers or reimbursements) paid by the fund and stated as a percent of the fund's total net assets. For other types of investments, the figure in the expense ratio field reflects similar information, but may have been calculated differently than for mutual funds. Mutual fund data comes from the fund's prospectus. For non-mutual fund investment options, the information has been provided by the plan sponsor, the investment option's manager or the trustee. When no ratio is shown for these options it is because none was available. There may be fees and expenses associated with the investment option. Expense information changes periodically. Please consult NetBenefits for updates.

SPECIFIC FUNDS

Morningstar, Inc., provided data on the non-Fidelity mutual funds. Although the data is gathered from reliable sources, accuracy and completeness cannot be guaranteed by Morningstar.

¹ On December 1, 2015, this fund (formerly Fidelity® Cash Reserves) was approved to operate as a government fund with different investment policies. The historical performance may not represent its current investment policies.

² Initial offering of Premium Class shares for Fidelity Government Money Market Fund was on 04/06/2015. Returns and expenses prior to that date are those of Fidelity Government Money Market Fund (SPAXX). Had Fidelity Government Money Market Fund - Premium Class expenses been reflected in the returns shown, total returns would have been higher.

INVESTMENT RISK

²⁴ Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market or economic developments.

²⁵ Fidelity Freedom Funds are designed for investors expecting to retire around the year indicated in each fund's name. Except for the Freedom Income Fund, the funds' asset allocation strategy becomes increasingly conservative as it approaches the target date and beyond. Ultimately, they are expected to merge with the Freedom Income Fund. The investment risks of each Fidelity Freedom Fund change over time as its asset allocation changes. They are subject to the volatility of the financial markets, including equity and fixed income investments in the U.S. and abroad and may be subject to risks associated with investing in high yield, small cap and, commodity-related, foreign securities. Principal invested is not guaranteed at any time, including at or after their target dates.

²⁶ Fidelity Government Mutual Fund Money Market: **You could lose money by investing in a money market fund. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Fidelity Investments and its affiliates, the fund's sponsor, have no legal obligation to provide financial support to money market funds and you should not expect that the sponsor will provide financial support to the fund at any time.**

Fidelity's government and U.S. Treasury money market funds will not impose a fee upon the sale of your shares, nor temporarily suspend your ability to sell shares if the fund's weekly liquid assets fall below 30% of its total assets because of market conditions or other factors.

²⁷ In general the bond market is volatile and bonds entail interest rate risk (as interest rates rise bond prices usually fall and vice versa). This effect is usually pronounced for longer-term securities. Bonds also entail the risk of issuer default, issuer credit risk and inflation risk.

²⁸ Lower-quality debt securities involve greater risk of default or price changes due to potential changes in the credit quality of the issuer.

²⁹ Investments in mid-sized companies may involve greater risk than those of larger, more well known companies, but may be less volatile than investments in smaller companies.

³⁰ Investments in smaller companies may involve greater risk than those in larger, more well known companies.

³¹ Foreign investments, especially those in emerging markets, involve greater risk and may offer greater potential returns than U.S. investments. This risk includes political and economic uncertainties of foreign countries, as well as the risk of currency fluctuation.

³² Because of their narrow focus, sector funds may be more volatile than funds that diversify across many sectors.

³³ Changes in real estate values or economic downturns can have a significant negative effect on issuers in the real estate industry.

MARKET INDICATORS

Indices are unmanaged and you cannot invest directly in an index

DJ Industrial Average The Dow Jones Industrial Average (DJIA) is an unmanaged price-weighted index and is the most widely used indicator of how the country's industrial leaders are performing. Also known as "the Dow," this is a formula based on the stock prices of 30 major companies chosen from sectors of the economy most representative of our country's economic condition.

MSCI EAFE (Net MA) The MSCI Europe, Australasia and Far East Index (net MA tax) is an unmanaged market capitalization-weighted index of equity securities of companies domiciled in various countries. The index is designed to represent performance of developed stock markets outside the United States and Canada and excludes certain market segments unavailable to U.S. based investors. The index returns for periods after 1/1/1997 are adjusted for tax withholding rates applicable to U.S.-based mutual funds organized as Massachusetts business trusts.

S&P 500 S&P 500 Index is a market capitalization-weighted index of 500 common stocks chosen for market size, liquidity, and industry group representation to represent U.S. equity performance.

Russell 2000 The Russell 2000[®] Index is an unmanaged market capitalization-weighted index of 2,000 small company stocks of U.S. domiciled companies.
